Professional Summary

Aspiring software developer completing a B.Tech in Computer Science and Engineering (Class of 2026) with hands-on experience building RESTful backend services using Java and Spring Boot and integrating with MySQL. Strong foundations in data structures, algorithms and frontend basics including HTML, CSS and JavaScript, with exposure to Agile remote collaboration. Solved 500+ DSA problems and eager to deepen skills in data science through immersive bootcamp and industry projects.

Education

Roorkee Institute of Technology, Uttarakhand

Bachelor of Technology, Computer Science and Engineering

Jul 2022 - Jun 2026

Uttarakhand

• **GPA:** 7.5

• **Coursework:** Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

Experience

Arcoiris Logics

Jul 2025 - Sep 2025

Software Development Engineer Intern (Backend)

Remote

- Developed scalable backend services using Java and Spring Boot in a remote environment.
- Designed and implemented RESTful APIs with validation and exception handling, showcasing programming proficiency.
- Integrated backend services with MySQL focusing on optimized queries.
- Collaborated with frontend teams for smooth API integration, demonstrating curiosity by proactively learning React.
- Followed Agile practices and participated in code reviews using Git.

Movidu Technology Pvt. Ltd.

Aug 2025 - Dec 2025

Business Development Executive

On-site

Movidu Technology Pvt. Ltd. - On-site

- Worked closely with technical teams using agile development workflows to translate business requirements into solutions.
- Interacted with stakeholders to improve communication and requirement clarity.
- Strengthened client-facing communication for global customers.

Projects

Trello Manager – Task Management System

- Developed a backend-driven task management system with authentication.
- Designed REST APIs to support frontend integration.
- Implemented database persistence and server-side validation.
- Followed layered architecture for scalable applications.

Dynamic Multilevel Caching System

- Designed a multilevel caching system using object-oriented C++.
- Implemented LRU and LFU eviction policies.
- Reduced cache misses through dynamic policy selection.

Chat Room Application

- Developed a full-stack real-time chat application using React for the frontend and Spring Boot for backend services.
- Implemented REST APIs for user authentication, message exchange, and chat room management.
- Integrated frontend with backend APIs to enable real-time message updates and seamless user experience.
- Designed secure backend architecture with proper validation and persistence for chat data.

Technical Skills

- **Languages:** C++, Java, SQL, C
- **Backend:** Spring Boot, REST APIs
- **Frontend Basics:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, PostgreSQL
- **Server Basics:** Client-Server Architecture, HTTP/HTTPS
- **Tools:** Git, GitHub, IntelliJ IDEA, VS Code
- **Professional Skills:** Programming Proficiency, Agile Development Workflows, Curiosity

Achievements

- Solved 500+ DSA problems using C++ and Java.
- Secured 6th Rank in GeeksforGeeks contests.
- Winner of GFG & Deutsche Bank Streak Challenge (twice).
- NCC 'B' and 'C' Certificate holder.
